

SECTION XV
BASE METALS AND ARTICLES OF BASE METAL

NOTES :

1. This Section does not cover :

(a) prepared paints, inks or other products with a basis of metallic flakes or powder (headings 3207 to 3210, 3212, 3213 or 3215);

(b) ferro-cerium or other pyrophoric alloys (heading 3606);

(c) headgear or parts thereof of heading 6506 or 6507;

(d) umbrella frames or other articles of heading 6603;

(e) goods of Chapter 71 (for example, precious metal alloys, base metal clad with precious metal, imitation jewellery);

(f) articles of Section XVI (machinery, mechanical appliances and electrical goods);

(g) assembled railway or tramway track (heading 8608) or other articles of Section XVII (vehicles, ships and boats, aircraft);

(h) instruments or apparatus of Section XVIII, including clock or watch springs;

(ij) lead shot prepared for ammunition (heading 9306) or other articles of Section XIX (arms and ammunition);

(k) articles of Chapter 94 (for example, furniture, mattress supports, lamps and lighting fittings, illuminated signs, prefabricated buildings);

(l) articles of Chapter 95 (for example, toys, games, sports requisites);

(m) hand sieves, buttons, pens, pencil-holders, pen nibs or other articles of Chapter 96 (miscellaneous manufactured articles); or

(n) articles of Chapter 97 (for example, works of art).

2. Throughout this Schedule, the expression "parts of general use" means :

(a) articles of headings 7307, 7312, 7315, 7317 or 7318 and similar articles of other base metal;

(b) springs and leaves for springs, of base metal, other than clock or watch springs (heading 9114); and

(c) articles of headings 8301, 8302, 8308, 8310 and frames and mirrors, of base metal, of heading 8306.

In Chapters 73 to 76 and 78 to 82 (but not in heading 7315) references to parts of goods do not include references to parts of general use as defined above.

Subject to the preceding paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.

3. Throughout this Schedule, the expression "base metals" means :

iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

4. Throughout this Schedule, the term "cermets" means products containing a microscopic

heterogeneous combination of a metallic component and a ceramic component. The term “cermets” includes sintered metal carbides (metal carbides sintered with a metal).

5. Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74) :

(a) an alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals;

(b) an alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present;

(c) in this Section, the term “alloys” includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in this Schedule to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles :

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the Interpretive Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals.

For this purpose:

(a) iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;

(b) an alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and

(c) a cermet of heading 8113 is regarded as a single base metal.

8. In this Section, the following expressions have the meanings hereby assigned to them :

(a) waste and scrap:

metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

(b) Powders:

products of which 90% or more by weight passes through a sieve having a mesh aperture of 1 mm.

CHAPTER 72

Iron and steel

NOTES :

1. In this Chapter and, in the case of Notes (d), (e) and (f) throughout this Schedule, the following expressions have the meanings hereby assigned to them:

(a) Pig Iron:

Iron-carbon alloys not usefully malleable, containing more than 2% by weight of carbon and which may contain by weight one or more other elements within the following limits:

- not more than 10% of chromium
- not more than 6% of manganese
- not more than 3% of phosphorus
- not more than 8% of silicon
- a total of not more than 10% of other elements.

(b) Spiegeleisen:

Iron-carbon alloys containing by weight more than 6% but not more than 30% of manganese and otherwise conforming to the specification at (a) above.

(c) Ferro-alloys:

Alloys in pigs, blocks, lumps or similar primary forms, in forms obtained by continuous casting and also in granular or powder forms, whether or not agglomerated, commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in ferrous metallurgy and generally not usefully malleable, containing by weight 4% or more of the element iron and one or more of the following:

- more than 10% of chromium
- more than 30% of manganese
- more than 3% of phosphorus
- more than 8% of silicon
- a total of more than 10% of other elements, excluding carbon,

subject to a maximum content of 10% in the case of copper.

(d) Steel :

Ferrous materials other than those of heading 7203 which (with the exception of certain types produced in the form of castings) are usefully malleable and which contain by weight 2% or less of carbon. However, chromium steels may contain higher proportions of carbon.

(e) Stainless steel:

Alloy steels containing, by weight, 1.2% or less of carbon and 10.5% or more of chromium, with or without other elements.

(f) Other alloy steel :

Steels not complying with the definition of stainless steel and containing by weight one or more of the following elements in the proportion shown:

- 0.3% or more of aluminum
- 0.0008% or more of boron
- 0.3% or more of chromium
- 0.3% or more of cobalt
- 0.4% or more of copper
- 0.4% or more of lead
- 1.65% or more of manganese
- 0.08% or more of molybdenum

- 0.3% or more of nickel
- 0.06% or more of niobium
- 0.6% or more of silicon
- 0.05% or more of titanium
- 0.3% or more of tungsten (wolfram)
- 0.1% or more of vanadium
- 0.05% or more of zirconium
- 0.1% or more of other elements (except sulphur, phosphorus, carbon and nitrogen), taken separately.

(g) Remelting scrap ingots of iron and steel:

Products roughly cast in the form of ingots without feeder-heads or hot tops, or of pigs, having obvious surface faults and not complying with the chemical composition of pig iron, spiegeleisen or ferro-alloys.

(h) Granules:

Products of which less than 90% by weight passes through a sieve with a mesh aperture of 1 mm and of which 90% or more by weight passes through a sieve with a mesh aperture of 5 mm.

(ij) Semi-finished products:

Continuous cast products of solid section, whether or not subjected to primary hot-rolling; and other products of solid sections, which have not been further worked than subjected to primary hot-rolling or roughly shaped by forging, including blanks for angles, shapes or sections.

These products are not presented in coils.

(k) Flat-rolled products :

Rolled products of solid rectangular (other than square) cross-section, which do not conform to the definition at (ij) above in the form of:

- coils of successively superimposed layers, or
- straight lengths, which if of a thickness less than 4.75 mm, are of width measuring at least ten times the thickness or if of a thickness of 4.75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, chequers, tears, buttons and lozenges) and those, which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products of other headings.

(l) Bars and rods, hot-rolled, in irregularly wound coils:

Hot-rolled products in irregularly wound coils, which have a solid cross-section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles, or other convex polygons (including “flattened circles” and “modified

rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) Other bars and rods:

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including “flattened circles” and “modified rectangles”, of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). The products may:

- have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);
- be twisted after rolling.

(n) Angles, shapes and sections:

Products having a uniform solid cross-section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.

Chapter 72 does not include products of heading 7301 or 7302.

(o) Wire:

Cold-formed products in coils, of any uniform solid cross-section along their whole length, which do not conform to the definition of flat-rolled products.

(p) Hollow drill bars and rods:

Hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in heading 7304.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.

3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the headings of this Chapter appropriate to similar hot-rolled products.

SUB-HEADING NOTES :

1. In this Chapter, the following expressions have the meanings hereby assigned to them:

(a) Alloy pig iron:

Pig iron containing, by weight, one or more of the following elements in the specified proportions:

- more than 0.2% of chromium
- more than 0.3% of copper
- more than 0.3% of nickel
- more than 0.1% of any of the following elements:
aluminium, molybdenum, titanium, tungsten (wolfram), vanadium.

(b) Non-alloy free-cutting steel:

Non-alloy steel containing, by weight, one or more of the following elements in the specified proportions:

- 0.08% or more of sulphur
- 0.1% or more of lead
- more than 0.05% of selenium
- more than 0.01% of tellurium
- more than 0.05% of bismuth.

(c) Silicon-electrical steel:

Alloy steels containing, by weight, at least 0.6% but not more than 6% of silicon and not more than 0.08% of carbon. They may also contain by weight not more than 1% of aluminium but no other element in a proportion that would give the steel the characteristics of another alloy steel.

(d) High speed steel:

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by weight of 7% or more, 0.6% or more of carbon and 3 to 6% of chromium.

(e) Silico-manganese steel:

Alloy steels containing by weight:

- not more than 0.7% of carbon
- 0.5% or more but not more than 1.9% of manganese; and
- 0.6% or more but not more than 2.3% of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the sub-headings of heading 7202, the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant sub-heading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1(c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1(c) must each exceed 10% by weight.

SUPPLEMENTARY NOTES :

1. Skelp means hot-rolled narrow strip of width not exceeding 600 mm with rolled (square, slightly round or bevelled) edge.
2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.
3. Iron or steel products obtained by electrolytic deposition, by pressure casting by sintering are to be classified, according to their form, their composition and their appearance, in the headings of this Chapter appropriate to similar hot-rolled products.

Tariff Item	Description of goods	Unit	Rate of duty	
			Standard	Preferential Areas
(1)	(2)	(3)	(4)	(5)
I.—PRIMARY MATERIALS; PRODUCTS IN GRANULAR OR POWDER FORM				
7201	PIG IRON AND SPIEGELEISEN IN PIGS, BLOCKS OR OTHER PRIMARY FORMS			
7201 10 00	- Non-alloy pig iron containing by weight 0.5% or less of phosphorus	kg.	10%	-
7201 20 00	- Non-alloy pig iron containing by weight more than 0.5% of phosphorus	kg.	10%	-
7201 50	- <i>Alloy pig iron; spiegeleisen :</i>

EXEMPTION NOTIFICATIONS**Exemption to inputs required for the manufacture of iron and steel intermediates when imported into India.**

[Notfn. No. 10/95-Cus. dt. 7.3.1995 as amended by Notfn. Nos. 101/95-Cus. dt. 26.5.1995, 143/95-Cus. dt. 19.5.1995, 157/95-Cus. dt. 9.11.1995, 23/96-Cus. dt. 15.6.1996]

In exercise of the powers conferred by sub-section (1) of section 25 of the Customs Act, 1962, the Central Government, being satisfied that it is necessary in the public interest so to do, hereby exempts inputs required for the manufacture of iron and steel intermediates when imported into India, from the whole of the duty of customs leviable thereon under the First Schedule to the Customs Tariff Act, 1975 (51 of 1975), subject to the following conditions, namely:-

- (1) that the importer has been granted necessary import licence (hereinafter referred to as the said licence) by the Licensing Authority for the import of the said inputs for the aforesaid purpose in terms of Engineering Products Export (Replenishment of Iron and Steel Intermediates) scheme as notified by the Government of India in the Ministry of Commerce Notification No. S.O. 130. (e) dated the 1st March, 1995 and the said licence has been produced at the time of clearance for debit by the proper officer of customs;
- (2) Omitted
- (3) the importer furnishes a bond, with such surety or security, in such form as may be specified by the Assistant Commissioner of Customs or Deputy Commissioner of Customs binding himself to pay on demand an amount equal to the duty leviable on the said inputs but for the exemption contained herein, in respect of which the conditions specified in this notification have not been complied with; together with interest at the rate of 24% per annum from the date of clearance of the said inputs.
- (4) that the importer produces evidence of having discharged the obligation relating to supply of iron and steel intermediates to the Engineering Products exporters to the satisfaction of the Assistant Commissioner of Customs within a period of thirty days from the expiry of period allowed for fulfilment of the obligation or within such extended period as the said Assistant Commissioner of Customs or Deputy Commissioner of Customs may allow;
- (5) that the inputs so imported shall not be disposed off or utilised in any manner, except for utilisation in the discharge of obligation to manufacture and supply iron and steel intermediates in terms of this notification, before the said obligation under the said licence has been discharged in full:

Provided that spares and consumables imported in terms of this notification shall not be loaned, transferred, sold or disposed of in any manner, and shall be used by the importer only in his factory;

- (6) where benefit of this notification is sought by a person other than the licensee, such benefit shall be allowed against the said licence only if it bears endorsement of transferability by the Licencing Authority:

Provided that endorsement of transferability shall not be made by the Licencing Authority before the obligation to supply iron and steel intermediates under the said licence has been fulfilled.

- (7) that the imports and exports are undertaken through sea ports at Bombay, Calcutta, Cochin, Kandla, Mangalore, Marmagoa, Madras, Nhava Sheva, Paradeep, Tuticorin and Visakhapatnam, or through any of the airports at the Ahmedabad, Bangalore, Bombay, Calcutta, Coimbatore, Delhi, Hyderabad, Jaipur, Madras, Srinagar, Trivandrum and Varanasi or through any of the Inland Container Depots at Bangalore, Coimbatore, Delhi, Gauhati, Hyderabad, Kanpur, Ludhiana, Moradabad, Pimpri(Pune) and Pitampur (Indore):

Provided that the Commissioner of Customs may by special order and subject to such conditions as may be specified by him, permit import and export through any other sea port, airport or Inland Container Depot or through a land customs station"

Explanation. - In this notification,-

- (i) "Engineering products" means export items (other than iron steel, ferro alloys and refractories) specified under the export product group "Engineering Products" in the I-O Norms and which have already been exported;
- (ii) 'I-O Norms' means the Standard Input-Output and Value Addition norms as contained in the Hand Book of Procedures (Volume II) published vide public Notice No.121 (PN)/92-97 dated the 31 March, 1992 of the Government of India in the Ministry of Commerce, as amended from time to time;
- (iii) "inputs" means, -
- (a) raw materials, components, intermediates and consumables specified as import itmes in the I-O Norms and required for the manufacture of iron and steel intermediates;and
- (b) spares for a value not exceeding 5% of the value of the licence required for the maintenance of capital goods installed in the importer's factory.
- (iv) "Iron and Steel Intermediates" means export Items specified under sub-group "Iron, Steel, Ferro Alloys and Refractories" under the export product group "Engineering Products" in I-O Norms and in respect of which value addition has been specified in the I-O Norms, and such items are supplied to an exporter as replenishment for similar items already used in the manufacture of the Engineering Products against a Release Advice issued by the Licensing Authority:

Provided that no such Release Advice shall be issued by the Licensing Authority where benefit of duty exemption for such items has been availed under any other scheme.

- (v) "Licensing Authority" means the Director General of Foreign Trade appointed under section 6 of the Foreign Trade (Development and Regulation) Act, 1992 (22 of 1992) or an officer authorised by him to grant a licence under the said Act;
- (vi) "Release Advice" means a Release Order indicating the name, description and technical characteristics of the iron and steel intermediates, their quantities and value thereof as per the I-O norms.
