

## CHAPTER 26

*Ores, slag and ash*

## NOTES:

1. This Chapter does not cover:

- (a) slag or similar industrial waste prepared as macadam (heading 2517);
- (b) natural magnesium carbonate (magnesite), whether or not calcined (heading 2519);
- (c) sludges from the storage tanks of petroleum oils, consisting mainly of such oils (2710);
- (d) basic slag of Chapter 31;
- (e) slag wool, rock wool or similar mineral wools (heading 6806);
- (f) waste or scrap of precious metal or of metal clad with precious metal; other waste or scrap containing precious metal or precious metal compounds, of a kind used principally for the recovery of precious metal (heading 7112); or
- (g) copper, nickel or cobalt mattes produced by any process of smelting (Section XV).

2. For the purposes of headings 2601 to 2617, the term “ores” means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading 2844 or of the metals of Section XIV or XV, even if they are intended for non-metallurgical purposes. Headings 2601 to 2617 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.

3. Heading 2620 applies only to:

- (a) slag, ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals, excluding slag, ash and residues from the incineration of municipal waste (heading 2621); and
- (b) slag, ash and residues containing arsenic, whether or not containing metals, of a kind used either for the extraction of arsenic or metals or for the manufacture of their chemical compounds.

## SUB-HEADING NOTES :

1. For the purposes of sub-heading 2620 21, “leaded gasoline sludges and leaded anti-knock compound sludges” mean sludges obtained from storage tanks of leaded gasoline and leaded anti-knock compounds (for example, tetraethyl lead), and consisting essentially of lead, lead compounds and iron oxide.

2. Slag, ash and residues containing arsenic, mercury, thallium or their mixtures, of a kind used for the extraction of arsenic or those metals or for the manufacture of their chemical compounds, are to be classified in sub-heading 2620 60.

**Exemption to copper concentrates falling under item 2603 00 00 when imported into India, from so much of the duty of customs as is equivalent to the duty of customs leviable on the value of gold and silver contained in such copper concentrate.**

[Notifn. No.24/2011-Cus., dt. 1.3.2011].

In exercise of the powers conferred by sub-section (1) of section 25 of the Customs Act, 1962 (52 of 1962), the Central Government, on being satisfied that it is necessary in the public interest so to do, hereby exempts copper concentrates falling under the tariff item 2603 00 00 of the First Schedule to the Customs Tariff Act, 1975(51 of 1975), when imported into India, from so much of the duty of customs as is equivalent to the duty of customs leviable on the value of gold and silver contained in such copper concentrate, subject to the condition that the importer produces to the Assistant Commissioner of Customs or Deputy Commis-

sioner of Customs, as the case may be, an assay certificate from the mining company specifying separately, the value of gold and silver content in such copper concentrate.

*Illustration.*- If the total value of copper concentrate is ₹ 100 and value of gold and silver in that copper concentrate is ₹ 40, basic customs duty shall be computed on the value of ₹ 60 only. However, the total value of ₹ 100 shall be taken into account, for the purposes of levy of additional duties of customs leviable under section 3 of the Customs Tariff Act, 1975.
